

# MAKE A MAIL RAIL YORK

1. Colour in and decorate your York.
2. Cut along the dotted line.
3. Fold down the bold lines for the glue flaps and edges of the York.
4. Stick the York together using glue or tape. Leave the top flap unglued so that you can use it as a box to put things in!

Yorks were wheeled containers loaded onto Mail Rail trains. They carried parcels, letters and important messages from all over the UK and around the world as they travelled across London on Mail Rail. Some of them were even used by Mail Rail engineers to store their tools and equipment.

**What will you keep in your York?**

**TIP:** You can cut the lid off the template and make your own cover with coloured paper.
